WorkMeetGrow

BE INSPIRED AT ORBISENERGY

- Flexible office accommodation
- Unrivalled conference facilities
- Co-working and project spaces
- Virtual office solutions (VIP)
- Networking and business support

Clean Energy

The UK's Clean Energy Region

Norfolk and Suffolk's clean energy sector is thriving. With significant growth in offshore and onshore wind, large-scale solar, nuclear and biomass, we are leading the UK in energy diversity with a mix of large-scale energy generation coupled with expertise in local generation, utility networks and energy storage innovations.

52% of the UK's offshore wind capacity is either operational, under construction or preparing for construction off the coasts of Norfolk and Suffolk, positioning our region at the centre of the global offshore wind revolution. Alongside large-scale construction, the area is a world-renowned North Sea operations & maintenance base, offering a competitive and integrated supply chain, versatile port infrastructure and a highly skilled energy workforce.

A Gateway to Opportunity

Located at the UK's most easterly point in Lowestoft, Suffolk, OrbisEnergy is a landmark innovation and incubation centre supporting clean energy businesses. Offering high specification workspace, exceptional conference and meeting facilities and virtual office solutions, OrbisEnergy provides a perfect springboard for clean energy businesses to work, meet and grow.

At the centre of the clean energy transition is OrbisEnergy

- 24-hour building access and free onsite parking
- Virtual office solutions (Virtual Incubation & Innovation Programme-VIP)
- Engagement with innovation, R&D, technology acceleration and funding programmes including the ORE Catapult

Perfect Choice

Success

Success

Proud of our reputation as an incubator for innovative companies and as a landing pad for established players coming into the region's clean energy sector, OrbisEnergy's mission is to ensure we provide an unrivalled environment, service and the opportunities for our clients to grow and succeed. Our tenants, past and present, give testimony to this:

" OrbisEnergy gave us an operating presence at the heart of the industry, and since our initial entry, we have extended within OrbisEnergy. It gave us the opportunity to work alongside important clients and partner companies. An innovation centre is designed to build business and to help its occupants win business and working within the OrbisEnergy environment we have achieved that. "

Martin Dronfield, James Fisher Marine Services

" Having a presence at OrbisEnergy has been integral in enabling us to establish and maintain contacts with the local supply chain and the many stakeholders who are integral to our projects. "

Charlie Jordan,
East Anglia ONE
Project Director

" OrbisEnergy, located at the centre of European offshore wind and the operational heart of the UK's energy sector, is a superb facility that provides us with access to the local academic and technical human resources we need for our International business serving 260 clients in 26 countries. As we have grown, OrbisEnergy has accommodated us, making it the right choice as our permanent HQ. "

Chris Anderson, CEO, 4C Offshore Ltd.
